

Baird Creek Potential Eagle Scout Projects

Potential Eagle Scout Projects

SIGNAGE:

Redo Cross Country Skill Trail Signage at Lower Parking Lot and arrows for the 5 miles of trails. Would require working with the City of Green Bay and the Baird Creek Foundation to create a plan, get approvals, and then get a crew of helpers to work build and install signage and buy and install arrows.

BOARDWALK RAMPS:

Build small ramps to boardwalks along the trail east of Superior Rd as there are many areas with trip hazards (estimation of 12 ramps needed). As well as two others in another location. These are just short ramps to reduce the inches from ground to the boardwalk's height.

Would require working with the City of Green Bay and the Baird Creek Foundation to create a plan, get approvals, and then get a crew of helpers to build and install ramps.

Potential Eagle Scout Projects

BOARDWALK:

Build a boardwalk/bridge in an eroded area. Would require working with the City of Green Bay and the Baird Creek Foundation to create a plan, get approvals, and then get a crew of helpers to build and install the boardwalk.

EROSION CONTROL:

Work on a badly eroding gully. This would require working with the DNR, the City of Green Bay, and the Baird Creek Foundation to create a plan, get approvals, and then get a crew of helpers to work on implementing the plan. This would be behind Christa McAuliffe Park way back by the creek where we are about to lose a mountain bike boardwalk into the creek due to erosion.
